2018 Summer Internship Opportunity at CMU

(Prof. James C. Hoe's Laboratory)

Ideal candidate(s): Someone who will or is currently pursuing a PhD such that the time at CMU will make a difference in her/his career, for example, an <u>undergraduate</u> nearing graduation looking to pursue PhD in the US.

Deadline to apply: To get through the visa process in time, the candidate should be identified by early February.

Background needed: <u>The student should be interested in doing in computer hardware and systems</u>. A student with strong digital design and FPGA experience is a plus.

Number of students needed: 2 students at most.

Duration of stay: The visit should last 10~12 weeks. (Summer vacation)

Total cost: The cost of travel, plus an additional financial support at a level equivalent to at least $12.50 per hour (approximately $5K~6K for 10 weeks). Students should provide the bank statement as proof first. Department will partially support the students depending on the situation.

Minimum English proficiency requirements: TOEFL minimum 84, 22 listening and 18 speaking. IELTS 6.0 listening and 6.5 speaking.
